DATA ANALYST COVER LETTER

youremail@gmail.com | (000) XXX-XXXX | 142 Your Address Blvd, City Name, CA XXXXX

[Today's Date]

[Hiring Manager's Name]
[341 Company Address]
[Company City, State xxxxx]
[(xxx) xxx-xxxx]
[hiring.manager@gmail.com]

Dear [Mr./Mrs./Ms.] [Manager's Name],

My name is [Your Name] and I am applying for the position of [position name] with your company as advertised on [company website / LinkedIn / job board website].

I have spent the past 8+ years doing number crunching and database management for a SAAS business, and I am keen to continue developing my career in the field of data analysis. I have always been a numbers person, with exceptional mathematics and computer skills. I am fluent in a number of data management systems and software, including Excel, mySQL, SPSS, and Oracle 11i. Statistical significance, A/B testing, and data-driven optimization are the rhythm of the drumbeat I march to.

As much as I'm into data manipulation, it's the analysis of data that really gets me going. I like to explore the relationships between numbers, and translate digits and spreadsheets into stories. In the age of big data, these stories become actionable solutions and strategies for businesses, and I take pride in my ability to make data accessible to both executive decision-makers and frontline sales staff.

On a personal level, I am detail-oriented, organized, and precise in my work; the only thing cleaner than my room are my spreadsheets. I have strong communication skills with a knack for clear and illuminating presentation. I'm comfortable on my own facing the numbers, but I really enjoy being part of a motivated team of smart people.

Please find my contact information at the top of this letter, as well as on my enclosed resume. I appreciate your time spent reading this letter, and look forward to connecting in the future.

Sincerely,

[Your Name]
