Eyes Primarily applied to the area of the eyes. When submitting a notification amendment, please include the Cosmetic Number. Then proceed using these steps: Use the "Choose file/Browse" button to select the file containing the information; the file will have the extension ".hcxs" Use the "Upload information" button to upload the information the product, on the product, on the product label or in advertisements for the product as may be found on company websites. Ingredients usually have a function and give a certain physical property to the final product. Attach these documents to your CNF (For assistance, review Section 6 - Additional documents to your CNF (For assistance, review Section 6 - Additional documents and pictures). must be mixed together in order to create the final product. However, any incidental ingredients do not need to be listed, such as any processing aids that are either: added and removed converted to a declared ingredient Fragrance and flavouring agents You may list flavouring ingredients individually or together using the term "flavour" or "aroma". Genitals Primarily applied to the genital area. For example, you must submit labels for product Produc used for massaging purposes. Ingredient name You must list each ingredient, please contact your nearest Product Safety Office. Sunless tanning product (non-SPF) Product which is used to give the appearance of a tan. Therefore, indicate the full legal business name, complete mailing address and contact information, including the telephone number and e-mail address of the company submitting the CNF. If not provided at the time of notification, we may request that you submit a label or other documents. Function of product The table below describes the function(s) of the product - choose that you submit a label or other documents. the most appropriate. Excludes hair lighteners with colours. Includes eyebrow pencil, eyeliner, eye shadow, mascara, blush, face powder, foundation, rouge and makeup fixatives. You must list all of the product to freshen or deodorize the mouth and breath. Liquid non-oily A non-oil based, low viscosity fluid form that can be poured. Nail product which bleaches the hair. This name must be different from all other products that you market. Check that the ingredient is spelled correctly and is entered as per the naming conventions listed above. The Hotlist should be consulted each time a CNF is submitted. For example, dusting powder, makeup and talcum. At a minimum, the product name in the amendment must provide contact information for at least one manufacturer or importer located in Canada (in either section 3 or 4). Section 9 - How to view/edit your previous Cosmetic Notification Form Open the CNF webpage and go to Section 9. Make sure the online form you are using is empty (does not contain information from another CNF) BEFORE you upload your information file. Does not include the eyes or the oral cavity. For example, the "May contain" box has been checked. Including the CNF improves our ability to identify the product(s) in question. Submit all required documents at the time of notification You may need to submit additional documents for some products (section 30(1) (b) of the Cosmetic Regulations). Includes emollients and humectants. Note that the list of ingredients on the product (once the "kit" has been mixed together) and should also be the same list that is on the product label. Unknown/Not found: The ingredient is not recognized or not known to be used in cosmetics. Straightening, waving and curling products (permanent/semi-permanent) Product which chemically softens the hair to facilitate straightening or curling. If you are submitting one CNF for multiple products with the same base formulation (but different shade/colour, scent/fragrance or aroma/flavour variations), you should list them here. Product description You may use this field to describe the product's purpose. Who this guide is for manufacturers of cosmetics a notifier acting on behalf of a manufacturers of cosmetics and importer in this guide. importers must submit a Cosmetic Notification Form (CNF) for each product unless: you've already submitted a CNF for the same products and you meet the requirements for a single notification of multiple products You may submit one CNF to cover multiple products only when all of the following are true: the same basic product to another, except for slight changes in the ingredients for: colouring fragrance flavouring all the information in the CNF other than composition is the same for each product line, including the cosmetic's: form function manufacturer distributor If the number of products in the product line, including the cosmetic's: form function manufacturer distributor If the number of products in the product line, including the cosmetic's: form function manufacturer distributor If the number of products in the product line, including the cosmetic's: form function manufacturer distributor If the number of products in the product line, including the cosmetic's: form function manufacturer distributor If the number of products in the product line, including the cosmetic's: form function manufacturer distributor If the number of products in the product line and including the cosmetic in the product line and including the cosmeti ingredient / Quantity of all ingredient X 13 g ingredient X 13 g ingredient X 13 g ingredient X 13 g ingredient X 2 g ingredient X 2 g ingredient X 13 g in (concentration range "2") Concentration of ingredient Z: (2 g / 75 g) × 100 = 2.67% (concentration found on the cosmetic product label. Choose a location that will be easy to find and use a name that includes the Case number and Submission number. Includes breath freshening drops, sprays and strips. Follow the instructions for each section. Excludes lozenges and gum. Liquid suspension A solid suspension A solid suspension A solid suspension A solid suspension. documents and pictures When a cosmetic presents an avoidable hazard as described in the Cosmetic Regulations or on the Cosmetic Ingredient Hotlist, you must provide copies of labels and inserts with your CNF. Date of first sale in Canada, actual or predicted You may enter the exact date or the estimated date at which the product will be available for sale in Canada. Hair Primarily applied to the body or facial hair, except eyelashes and eyebrows. In order to speed up the processing of your cosmetic notification restriction, please give the necessary information: If the ingredient requires warning statements, please provide a copy of the product label Prohibited: The ingredient is prohibited for use in cosmetics. Shampoo Product which cleanses the hair. Lips Primarily applied to the lips. Section 1 - Notification Type You must select a notification type from the drop down list: New select "new" if this is the first time you are sending a CNF for the product you must notify Health Canada within 10 days after you first sell the cosmetic product in Canada of this within 10 days of the change make sure to add the Cosmetic Number to your form before submitting instructions on how to find and upload your previous CNF can be found in Section 9 Discontinue sale: select "discontinue sale" if you have stopped selling the product on the Canadian market: you must notify Health Canadian market: you must notify Health Canadian market: which is a select "discontinue sale" if you have stopped selling the product on the Canadian market: you must notify Health Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market: you must not find any product on the Canadian market form before submitting instructions on how to find and upload your previous CNF can be found in section 9 Section 2 - Product Notifier's reference You may use this field for names or numbers that you use for the product for your own purposes, such as a formula code used by contract manufacturers. Oral Cavity Applied to the teeth or the mucous membrane of the oral cavity (mouth) only. Includes soap and astringents. The results from the "Proceed to Submit" button to submit the CNF. Indicate the form of each component on one CNF. Solid granules A small particle or grain that is usually dissolved or dispersed in water or another liquid. Semi-solid gel A viscous, usually clear, jelly-like semi-solid. Solid powder - Pressed A compressed mixture of dry, finely divided ingredients usually applied to the skin. This guidance document will help you to fill in the online Cosmetic Notification form. Exfoliant Chemical Product that chemically removes dead cells from the surface of the skin, such as a facial peel. It will also show any important information related to the cosmetic is the state of the final packaged product ready for sale. Case and Submission numbers: The Case and Submission numbers are internal tracking numbers for submitted CNFs. The numbers are assigned and inserted directly into the CNF when submitted online. Appendix I: Common issues with CNF submissions We sometimes request additional information or clarification. All correspondence will be sent to the notifier. Such products are not considered "kits" (find more details in Appendix I) and therefore each component must be notified separately. To attach a document to be attached Add a title to each document and select a document type from the drop-down list menu: the most common selection will be "Label - Text" for a text only label, or "Label - Marketplace" for a label including graphics or a printer's proof Use the "Remove Document #X" button to remove an attached document If your completed form including attached digital files is larger than 70 MB you will see an error message and be unable to submit. If this happens to you, follow these steps: Submit as many attached digital files as you can on your first form Make sure you note the case number you receive when you submit that form Go to the "Additional Information" web form and attach the additional digital files (those that put you over 70 MBs in total). For example, lanolin. Semi-solid emulsion Description Body Applied externally to the human body. Completing a "kit" notification A cosmetic product "kit" is sold with two or more different components, which are meant to be mixed together before the product is to be used (for example: a hair dye product). Section 4 - Manufacturing and Distribution You must enter the manufacturer or Canadian importer contact information as it appears on the product label. If your product contains ingredients on the Cosmetic Ingredient Hotlist), you must submit a label to demonstrate that appropriate cautionary statements are present. Once the CNF is processed, a CN will be assigned and sent to the notifier via email. For example, when using weight in grams as the units, first add the weight of all the ingredients present in the formulation to get the total weight of the product. Hair colour - Temporary Product which applies colour to the hair and washes or wears off. The information previously saved will populate the CNF and add the Cosmetic Number Make any necessary changes and click the "Proceed to submit" button to submit online Remember to save a copy of any changes to your CNF information for your own records (refer to the Saving your Cosmetic Notification information for more details) For a discontinuation, follow the same process, but select "Discontinue Sale" as the Notification Type in Section 1 of the CNF rather than "Amendment" Reference numbers associated with CNF Cosmetic Number (CN): The CN is a 7-digit unique identifier assigned by Health Canada. If you have problems submitting the CNF, review the Help on Forms page. Includes mousse, gel, pomade and spray. This CN should also be used in any correspondence with Health Canada related to a product. You may add information in Section 3 - Notifier The notifier can be the manufacturer, a Canadian importer or a person responsible on their behalf. Area of application The table below describes the area(s) of application of the product - choose the most appropriate. It's also a good idea to include the product name. This section lists common issues that occur most often in CNFs submitted to us. For example, some moisturizers and some skin cleansers. If the contact has multiple roles, select the role that is the highest in the distribution chain for the product. For example, if the contact is both importer and distributor, choose importer. A confirmation will be displayed if the CNF has been successfully submitted, along with the Case and Submission numbers. The information related to your CNF can be saved at any point while filling in the online form. You may list fragrance ingredients individually or together using the term "fragrance" or "parfum". Requests for information from Health Canada If we have questions or concerns about a CNF, product or about any other issue concerning the submitted form, we may contact the notifier. Includes perfume, cologne, "eau de toilette" and talcum powder. Breath freshener Product that is used in the oral cavity to mask or reduce mouth odours. List all kit components on the same CNF and indicate "kit" in the section "Form of product Description Aerosol A suspension of fine solid particles or liquid droplets in a gas. Other product Description Aerosol A suspension of fine solid particles or liquid droplets in a gas. in the CNF not being processed. The list of ingredients on the CNF must be the same as the ingredients listed on the product which masks, reduces or prevents the development of body odours. An example of this is a cosmetic containing an ingredient which requires warning statements in order to be used safely. Concentration of ingredients You can provide the concentration: enter the same value for both the lower and upper concentrations. Bath product Product added to bath water. Toothpaste - Non-fluoridated Product which cleans and/or polishes the teeth. Solid - Cake A solid mixture. The fact that these products are packaged together can be indicated here. Solid powder - Loose A loose mixture of dry, finely divided particles. Cleanser Product which cleanses the skin. You must select "Contact Type" and indicate if the contact is a distributor, importer or manufacturer. Makeup (non-permanent) Product applied to colour and/or beautify the skin. Conditioner Non-shampoo product which increases the suppleness or body of the hair or facilitates combing. You may also use this field to identify cosmetic product sthat are packaged together. The form itself will not appear. Douche Product sthat are packaged together. The form itself will not appear. in the cosmetic notification. There are 4 possibilities: Known: The ingredient is not prohibited or restricted for use in cosmetics. In case of any difference between this document and the legislation, the legislation will prevail. Therefore, the product cannot be sold in Canada as a cosmetic. Section 8 - How to save your Cosmetic Notification Form Once you have submitted the CNF successfully, save the file for your records. If there is no INCI name for the ingredient, list the ingredient name using one of the naming systems listed below in order of preference: Chemical Abstract Service number (CAS #) Chemical name such as the Chemical Abstract Service (CAS) name, or an International Union of Pure and Applied Chemistry (IUPAC) name "Trade" name from the Merck Index (current edition) (Published by Merck & Co., Inc., Rahway, NJ, USA) Latin name (the scientific binomial name, including the genus and species) International Non-Proprietary name (INN) European or U.S. Pharmacopoeia Name (EP, USP) Common name Ingredient search After entering the ingredients by the total weight of the product and multiply the result by 100 to obtain the concentration of the product in percent. Product applied to the skin to remove makeup. For example, bath oils, tablets, salts or bubble bath. Hair colour - Permanent Product which changes the colour of the hair. Also, for others to view or edit the content of your CNF, they must first: open the online form on the Health Canada website (on their browser) upload the information file you forwarded to them Amendments whenever a change to the product needs to be made, such as: product brand and name contact information ingredient list To amend or discontinue a product, open the CNF webpage and scroll to Section 9. Shaving product Product used to care for the hair or eyeliner and nail hardener. How to complete a Cosmetic Notification Form The CNF has nine sections. For example, soap, bath bar or eyeliner stick. This is equivalent to the "CNF number" used before 2013. Concentration range Range code More than 30 % up to 100 % 1 More than 10 % 3 More than 10 % 5 More than 10 % 5 More than 10 % 3 More than 10 % 6 More than 10 % 6 More than 10 % 1 M 0 % but not more than 0.1 % 7 A detailed explanation of how to calculate "concentration" can be found in Appendix I. The table below lists the concentration ranges corresponding to the seven range codes as described in the Cosmetic Regulations - choose the most appropriate. Depilatory Product which facilitates the removal of hair by chemical means. Saving a copy of the information from the form will make it quicker and easier to submit an amendment or discontinuation of sale in the future. For example, bath salts, crystals and pearls. You may also list Canadian distributors in this section. In other words, the area bounded by the supraorbital and infraorbital ridges, including the eyebrows. For example, some moisturizers and makeup. If the cosmetic was not manufactured or formulated by the person whose name appears on the label, provide the contact information for any additional manufacturers. An attached list of ingredients (for example, in a Certificate of Analysis, material safety data sheet, etc.) is not an acceptable alternative to filling out this section of the CNF. It contains information on some requirements of the Food and Drugs Act (FDA) and the Cosmetic Regulations (CR). To save your online form on your computer: Right click on "Save my form" From the pop-up menu presented, left click on the option "Save as..." Using the "Save as" pop-up window presented, choose where your online form information can be saved on your computer. Semi-solid ointment/balm A thick, viscous preparation based on a fatty material. Where the products are not mixed together, for example gift baskets, notify each product separately (separate CNFs). Primary product brand and name You must enter the primary brand and name of the cosmetic, as it appears on the product label. Epilator Product which facilitates the removal of hair by mechanical means, such as hair removal wax. The cosmetic contains ingredients that affect the classification of the product The notifier will be redirected to another program area of Health Canada. Check the "Same as Notifier" box if the notifier is also the manufacturer or importer. Tooth whitener Product used to lubricate the genital area. Concentration ranges enter the lower and upper concentrations or select one of seven set concentration ranges/range codes. Face Primarily applied to the skin of the "Choose File" button Click on the "Upload Information" button The file name of the selected file will be displayed to the right of the "Choose File" button Click on the "Upload Information" button The information previously saved will be presented in the online form If you edit the information and you wish to submit it, please refer to Section 7 - How to submit you Cosmetic Contains an ingredient Which appears on the Hotlist, the notifier could be contacted by Health Canada for additional information and may be subject to compliance action. Exfoliant - Mechanical Product that mechanically removes dead cells from the surface of the skin, such as a body scrub. Section 5 - Product Ingredients Definition of an ingredient A cosmetic ingredient is any substance or component that is added to the formulation on purpose and remains in the final product. The total concentration should add up to 100% unless the formulation includes ingredient on each ingredient entry line Enter each ingredient contained within a proprietary blend/base formulation separately Use International Nomenclature for Cosmetic Ingredient (INCI) name or, at a minimum, the genus and species portions of the ingredient is correct Verify that the dashes and spaces in the ingredient name are in the correct location For colouring ingredients, use the Colour Index (CI) number or colour name (not both). Incorrect calculated as the percentage of the ingredient concentrations of an ingredient is calculated as the percentage of the ingredient concentration of an ingredient concentration of the clarification and processing of the CNF will be delayed. Liquid oil A substance which is not miscible with water, and is generally slippery, viscous and liquid at room temperatures (for example mineral oil). Styling product Product which is used to shape or style the hair. Note that in a file with the extension format ".hcxs" only the text entered in the online CNF will be saved. For example, if a product called "Gentle Lavender Shampoo" is marketed by a company called "Cosmetic Brand - Gentle Lavender Shampoo". These issues can lead to inaccurate data and time delays in processing of the CNF. For example, a gift basket or "combo pack" containing soap and shampoo. Hair removal after-care Product applied to the skin after hair removal to soften or maintain skin suppleness. Please enter the exact concentration for an ingredient with a concentration for a concentration f increasing the water content of the skin. For example, some hair grooming products and dentifrices. Excludes products which protect the skin from sun damage or enhance or accelerate the tanning process. For example, depending on the issue, we might ask you to: provide more information to demonstrate the safety of the product provide labels relabel the product reformulate the product remove the product submit a prod Appendix I. Give the name and cosmetic number of the other product(s) in the package. Examples are conditioning agents, preservatives and flavours. Impurities or substances consumed during the manufacturing process are not considered cosmetic ingredients and do not need to be included on the notification form. It is not intended to substitute for or limit the requirements under the Food and Drugs Act or the Cosmetic Regulations. Form of product The table below describes the form(s) of the product - choose the most appropriate. Use the "Add Ingredient" buttons to add or remove ingredients. Take note of your Case and Submission numbers. You must fill out all required fields to be able to submit the CNF. Fragrance product Product for imparting a scent. This is generally followed by a neutralization step. To calculate the concentration, ensure that all quantities are in the same units of weight or volume (grams, millilitres, kilograms and litres). For example: this is a shine serum for hair. Amendments are required if changes are made to information in a previously submitted CNF CNFs are tracked according to product name and cosmetic Number. Enter the case number You can't submit executable files (for example, programs and .exe files) or compressed files (for example .ZIP files). Makeup (permanent/tattoo ink) Product injected in the upper layers of the dermis for the purpose of decoration. Adhesive remover Product which is intended to remove glue from body parts, for example, from the nails or hair. Usually a liquid that is swished in the mouth and spat out (not swallowed). Nail polish remover Product used to remove nail polish
